BROKER & WHITE-LABEL PROGRAM

# Pricing & Commercial Terms

Brand the AlgoBars platform as your own and charge your traders whatever you want, and you keep **100% of the markup**. Your cost to AlgoBars is two usage lines: **$3 per active account** and **$5 per million in volume**. No licence fee, no setup fee. Nothing else to itemize.

◈ AlgoBars is a technology licensor, not a broker-dealer.

| $0 | $3 | $5 | 100% |
|---|---|---|---|
| Licence fee and setup fee. No minimum. | Per active account per month, or its compute if greater. | Per million in volume traded. | Of your markup stays with you. |

HOW IT WORKS

# Brand it. Mark it up. Keep everything.

You run the brokerage and set every price your traders pay. AlgoBars charges you only for what an account actually uses: a per-account line and a volume line. There is no licence fee and no revenue share.

STEP 01

### Brand & deploy

White-label the full platform and onboard your traders under your own name.

STEP 02

### Charge any price

Set every subscription and fee yourself, and keep 100% of what you charge.

STEP 03

### Pay two usage lines

Per active account and per million in volume. Nothing else to reconcile.

YOUR COSTS · TWO USAGE LINES

LICENCE & SETUP

**No licence fee. No setup fee. No minimum.** $0

PER ACTIVE ACCOUNT · MONTHLY

## $3 /mo

### Or that account's compute, whichever is greater

Covers the full white-label platform plus every AI generation, trade signal, backtest and strategy run the account uses. Compute is metered automatically and built into the rate, so you never itemize a per-signal fee.

Most accounts sit at the $3 floor. Heavy AI users simply pay their compute instead, never both.

PER MILLION IN VOLUME

## $5.00

### Per million in volume routed through AlgoBars

Charged on the trading volume your traders route through the platform. This is the only execution-side cost. The spreads, swaps and commissions you charge stay entirely yours.

✓ **That's the entire price.**

No tiers, no per-signal fees, no separate data or AI charges, no licence fee. Just $3 (or compute) per active account and $5 per million in volume. You keep 100% of whatever you charge your traders.

WHAT YOU GET

# A full white-label brokerage, included.

Your usage covers the entire platform. Every capability below ships in every deployment at no extra cost. Compute, AI and data are built into the per-account rate.

- ✓ Full white-label branding

| SETUP FEE | **None.** No onboarding or integration charge. |
| CURRENCY | All amounts in **USD**, exclusive of taxes. |

### Regulatory positioning.

AlgoBars provides metered access to platform infrastructure as a **technology licensor**, not a broker-dealer or revenue-share partner. Fees are calculated on consumption and owed regardless of the Partner's own pricing, marketing or revenue model. The Partner is solely responsible for its retail pricing and end-user relationships.
